Advisory Action

This Office Action is in response to Applicant's proposed amendment and response <u>after Final</u> filed on 22 March 2007. The amendements have been considered and <u>will not be entered</u> as discussed below.

- 3. Applicants' amendment to claim 1 raises new issues with respect to rejections under 35 U.S.C 102(b) requiring further consideration and search. Applicants' amendment to claim 1, inserting the recitation "amine selected from the group consisting of N-acetyl glucosamine, N-acetyl galactosamine, N-acetyl mannosamine and mixtures thereof" requires further search and consideration under 35 U.S.C 102 as well as 35 U.S.C 103. Applicant's proposed cancellation of claim 11 will overcome rejection under 35 U.S.C 103(a) of claim 11.
- 11. Applicants' arguments with respect to rejections under 35 U.S.C 112 first paragraph were found unpersuasive and rejections of record are adhered to.

 The applicants argue that the Exmainer's use of the Webster's dictionary to define "regulating" is precluded by applicants exemplification/definition of the word "regulating the condition of skin" in the specification. The applicants notes "The specification states on page 5, line 32: ""regulating skin condition" includes prophylactically regulating and/or therapeutically regulating skin condition, and may involve one or more of the following benfits..."" The above quoted passage from the specification is not a clear definition of the word "regulating" in reference to the condition of skin since the words

being defined themselves are used in the definition. Furthermore, exemplification is not a clear way to define terms. Applicants further points other passages in the specification where the word "regulating" is used as definitions. Since these varying passages are using the terms in different contexts and gives the word "regulating" in differing scope, applicants is not deemed to have clearly defined the term in the specification. As such, the examiner's use of Webster's dictionary to define the term "regulating" is deemed proper and is adhered to.
